This differs from the AMA CPT book, in which the coder is directed to a code range that contains the resequenced code and description, rather than to a specific location.

Resequenced codes will appear in brackets in the headers, section notes, and code ranges. For example:

27327-27329 [27337, 27339] Excision Soft Tissue Tumors Femur/Knee. Codes [27337, 27339] are included in section 27327-27329 in their resequenced positions.

Code also toxoid/vaccine (90476-90749 [90620, 90621, 90625, 90630, 90644, 90672, 90673, 90674, 90750, 90756])

This shows codes 90620, 90621, 90625, 90630, 90644, 90672, 90673, 90674, 90750, and 90756 are resequenced in this range of codes.

## Code Ranges for Medicare Billing

Appendix E identifies all resequenced CPT codes. Optum360 will display the resequenced coding as assigned by the AMA in its CPT products so that the user may understand the code description relationships.

Each particular group of CPT codes in *Current Procedural Coding Expert* is organized in a more intuitive fashion for Medicare billing, being grouped by the Medicare rules and regulations as found in the official CMS online manuals, that govern payment of these particular procedures and services, as in this example:

### 99221-99233 Inpatient Hospital Visits: Initial and Subsequent

**CMS:** 100-4,11,40.1.3 Independent Attending Physician Services; 100-4,12,100.1.1 Teaching Physicians E/M Services; 100-4,12,30.6.10 Consultation Services; 100-4,12,30.6.15.1 Prolonged Services With Direct Face-to-Face Patient Contact; 100-4,12,30.6.4 Services Furnished Incident to Physician's Service; 100-4,12,30.6.9 Hospital Visit and Critical Care on Same Day

## Icons

- **New Codes**  
Codes that have been added since the last edition of the AMA CPT book was printed.
- ▲ **Revised Codes**  
Codes that have been revised since the last edition of the AMA CPT book was printed.
- **New Web Release**  
Codes that are new for the current year but will not be in the AMA CPT book until 2019.
- ▲ **Revised Web Release**  
Codes that have been revised for the current year, but will not be in the AMA CPT book until 2019.
- # **Resequenced Codes**  
Codes that are out of numeric order but apply to the appropriate category.
- ★ **Telemedicine Services**  
Codes that may be reported for telemedicine services. Modifier 95 must be appended to code.
- **Reinstated Code**  
Codes that have been reinstated since the last edition of the book was printed.

### Pink Color Bar—Not Covered by Medicare

Services and procedures identified by this color bar are never covered benefits under Medicare. Services and procedures that are not covered may be billed directly to the patient at the time of the service.

### Yellow Color Bar—Unlisted Procedure

Unlisted CPT codes report procedures that have not been assigned a specific code number. An unlisted code delays payment due to the extra time necessary for review.

### Green Color Bar—Resequenced Codes

Resequenced codes are codes that are out of numeric sequence—they are indicated with a green color bar. They are listed twice, in their resequenced position as well as in their original numeric position with a note that the code is out of numerical sequence and where the resequenced code and description can be found.

#### INCLUDES

#### Includes notes

Includes notes identify procedures and services that would be bundled in the procedure code. These are derived from AMA, CMS, NCCI, and Optum360 coding guidelines. This is not meant to be an all-inclusive list.

#### EXCLUDES

#### Excludes notes

Excludes notes may lead the user to other codes. They may identify services that are not bundled and may be separately reported, OR may lead the user to another more appropriate code. These are derived from AMA, CMS, NCCI, and Optum360 coding guidelines. This is not meant to be an all-inclusive list.

**Code Also** This note identifies an additional code that should be reported with the service and may relate to another CPT code or an appropriate HCPCS code(s) that should be reported along with the CPT code when appropriate.

**Code First** Found under add-on codes, this note identifies codes for primary procedures that should be reported first, with the add-on code reported as a secondary code.

#### Laboratory/Pathology Crosswalk

This icon denotes CPT codes in the laboratory and pathology section of CPT that may be reported separately with the primary CPT code.

#### Radiology Crosswalk

This icon denotes codes in the radiology section that may be used with the primary CPT code being reported.

#### Technical Component Only

Codes with this icon represent only the technical component (staff and equipment costs) of a procedure or service. Do not use either modifier 26 (physician component) or TC (technical component) with these codes.

#### Professional Component

Only codes with this icon represent the physician's work or professional component of a procedure or service. Do not use either modifier 26 (physician component) or TC (technical component) with these codes.

#### Bilateral Procedure

This icon identifies codes that can be reported bilaterally when the same surgeon provides the service for the same patient on the same date. Medicare allows payment for both procedures at 150 percent of the usual amount for one procedure. The modifier does not apply to bilateral procedures inclusive to one code.

#### Assist-at-Surgery Allowed

Services noted by this icon are allowed an assistant at surgery with a Medicare payment equal to 16 percent of the allowed amount for the global surgery for that procedure. No documentation is required.

#### Assist-at-Surgery Allowed with Documentation

Services noted by this icon are allowed an assistant at surgery with a Medicare payment equal to 16 percent of the allowed amount for the global surgery for that procedure. Documentation is required.

#### Add-on Codes

This icon identifies procedures reported in addition to the primary procedure. The icon "+" denotes add-on codes. An add-on code is neither a stand-alone code nor subject to multiple procedure rules since it describes work in addition to the primary procedure.

According to Medicare guidelines, add-on codes may be identified in the following ways:

**10021-10022 Fine Needle Aspiration**

**EXCLUDES** Percutaneous localization clip placement during breast biopsy (19081-19086)  
 Percutaneous needle biopsy of:  
 Abdominal or retroperitoneal mass (49180)  
 Bone (20220, 20225)  
 Bone marrow (38220-38221)  
 Epididymis (54800)  
 Kidney (50200)  
 Liver (47000)  
 Lung or mediastinum (32405)  
 Lymph node (38505)  
 Muscle (20206)  
 Nucleus pulposus, paravertebral tissue, intervertebral disc (62267)  
 Pancreas (48102)  
 Pleura (32400)  
 Prostate (55700, 55706)  
 Salivary gland (42400)  
 Spinal cord (62269)  
 Testis (54500)  
 Thyroid (60100)  
 Soft tissue percutaneous fluid drainage by catheter using image guidance (10030)  
 Thyroid cyst (60300)
