- hemorrhagic B54
- malaria B52.9
- with complications NEC B52.8
- glomerular disorder B52.8
- malignant (tertian) — see Malaria, falciparum
- mixed infections — code to first listed type in B50-B53
- ovale B53.8
- parasitologically confirmed NEC B53.8
- pellagrous, acute — see Malaria, falciparum
- Plasmodium (P.) falciparum NEC — see Malaria, falciparum
- malariae NEC B52.9
- with Plasmodium falciparum (and or vivax) — see Malaria, falciparum
C13 Malignant neoplasm of hypopharynx

Use additional code to identify:
- exposure to environmental tobacco smoke (Z77.22)
- occupational exposure to environmental tobacco smoke (Z77.27)
- history of tobacco dependence (Z87.891)

C13.0 Malignant neoplasm of posterior region

C13.1 Malignant neoplasm of supraglottic hypopharynx

C13.2 Malignant neoplasm of retropalatal area of hypopharynx

C13.3 Malignant neoplasm of retropalatal area of hypopharynx, unspecified

C13.4 Malignant neoplasm of retroglossal area of hypopharynx

C13.5 Malignant neoplasm of retroglossal area of hypopharynx, unspecified

C13.6 Malignant neoplasm of greater curvature of stomach, unspecified

C13.7 Malignant neoplasm of greater curvature of stomach

C13.8 Malignant neoplasm of lesser curvature of stomach

C13.9 Malignant neoplasm of lesser curvature of stomach, unspecified

C14 Malignant neoplasm of other and ill-defined sites in the lip, oral cavity and pharynx

Use additional code to identify:
- alcohol abuse and dependence (F10.2)
- exposure to environmental tobacco smoke (Z77.22)
- occupational exposure to environmental tobacco smoke (Z77.27)
- history of tobacco dependence (Z87.891)

Malignant neoplasms of digestive organs (C15-C26)

C15 Malignant neoplasm of esophagus

Use additional code to identify:
- alcohol abuse and dependence (F10.2)
- exposure to environmental tobacco smoke (Z77.22)
- occupational exposure to environmental tobacco smoke (Z77.27)
- history of tobacco dependence (Z87.891)

C16 Malignant neoplasm of stomach

Use additional code to identify:
- alcohol abuse and dependence (F10.2)
- exposure to environmental tobacco smoke (Z77.22)
- occupational exposure to environmental tobacco smoke (Z77.27)
- history of tobacco dependence (Z87.891)

C17 Malignant neoplasm of small intestine

C18 Malignant neoplasm of colon

C19 Malignant neoplasm of rectum

C20 Malignant neoplasm of anus and anal canal

C21 Malignant neoplasm of anus

C22 Malignant neoplasm of anal canal

C23 Malignant neoplasm of anus and anal canal

C24 Malignant neoplasm of esophagus

C25 Malignant neoplasm of stomach

C26 Malignant neoplasm of the esophagus (with or without stomach, large intestine, and small intestine)
Chapter 9. Diseases of the Circulatory System

9.1 Heart failure

9.2 Syntonic (congestive) heart failure

9.3 Diastolic (congestive) heart failure

9.4 Combined systolic and diastolic (congestive) heart failure

9.5 Heart failure, unspecified

9.6 Complications and ill-defined descriptions of heart disease

9.7 Intracardiac thrombosis, not elsewhere classified

9.8 Malignant, unspecified

9.9 Heart disease, unspecified

9.10 Other heart disorders in diseases classified elsewhere

9.11 Cerebrovascular diseases

9.12 Nontraumatic subarachnoid hemorrhage

9.13 Intracardiac thrombosis, not elsewhere classified

Chapter Specific Guidelines with Coding Examples

The chapter specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

a. Chronic obstructive pulmonary disease (COPD) and asthma

1) Acute exacerbation of chronic obstructive bronchitis and asthma

The codes in categories J44 and J45 distinguish between uncomplicated cases and those in acute exacerbation. An acute exacerbation is a worsening or a decompensation of a chronic condition. An acute exacerbation is not equivalent to an infection superimposed on a chronic condition, though an exacerbation may be triggered by an infection.

- Acute streptococcal bronchitis with acute exacerbation of COPD
- J20.2 Acute bronchitis due to streptococcus
- J44.0 Chronic obstructive pulmonary disease with acute lower respiratory infection
- J44.1 Chronic obstructive pulmonary disease with (acute) exacerbation

Explanation: ICD-10-CM uses combination codes to create organism-specific classifications for acute bronchitis. Category J44 codes include combination codes with severity components, which differentiate between COPD with acute lower respiratory infection (acute bronchitis), COPD with acute exacerbation, and COPD without mention of a complication (unspecified). An acute exacerbation is a worsening or a decompensation of a chronic condition. An acute exacerbation is not equivalent to an infection superimposed on a chronic condition, though an exacerbation may be triggered by an infection, as in this example.

Exacerbation of moderate persistent asthma with status asthmaticus
- J45.42 Moderate persistent asthma with status asthmaticus

Explanation: Category J45 Asthma includes severity-specific subcategories and fifth-character codes to distinguish between uncomplicated cases, those in acute exacerbation, and those with status asthmaticus.

b. Acute respiratory failure

1) Acute respiratory failure as principal diagnosis

A code from subcategory J96.0 is the recommended choice for acute respiratory failure, or subcategory J96.2. Acute and chronic respiratory failure may be assigned as a principal diagnosis when it is the condition established after study to be chiefly responsible for occasioning the admission to the hospital, and the selection is supported by the Alphabetic Index and Tabular List. However, chapter-specific coding guidelines (such as obstructive, poisoning, HIV, new) that provide sequencing direction take precedence.

- Acute hypoxic respiratory failure due to COPD exacerbation
- J96.01 Acute respiratory failure with hypoxia
- J44.1 Chronic obstructive pulmonary disease with (acute) exacerbation

Explanation: Category J96 classifies respiratory failure with combination codes that designate the severity and the presence of hypoxia and hypercapnia. Code J96.01 is sequenced as the first-listed diagnosis, as the reason for the admission. Respiratory failure may be assigned as a principal diagnosis when it is the condition established after study to be chiefly responsible for occasioning the admission to the hospital and the selection is supported by the Alphabetic Index and Tabular List.

2) Acute respiratory failure as secondary diagnosis

Respiratory failure may be listed as a secondary diagnosis if it occurs after admission, or if it is present on admission, but does not meet the definition of principal diagnosis.

c. Influenza due to certain identified influenza viruses

Code only confirmed cases of influenza due to certain identified influenza viruses (category J10, and due to other identified influenza virus (category J18). This is an exception to the hospital inpatient guideline Section II, H. (Unspecified Organism).

In this context, “confirmation” does not require documentation of positive laboratory testing specific for a novel or other novel influenza A or other identified influenza virus. However, coding should be based on the provider’s diagnostic statement that the patient has an influenza, or other novel influenza A, for category J09, or J10, but not identified as novel or variant, for category J18.

Acute respiratory failure due to accidental overexposure
- T40.21XA Poisoning by other opioids, accidental (unintentional), initial encounter
- J96.00 Acute respiratory failure, unspecified whether with hypoxia or hypercapnia

Explanation: Respiratory failure may be assigned as a principal diagnosis when it is the condition established after study to be chiefly responsible for occasioning the admission to the hospital, and the selection is supported by the Alphabetic Index and Tabular List. However, chapter-specific coding guidelines, such as poisoning, that provide sequencing direction take precedence. When coding a poisoning or reaction to the improper use of a medication (e.g. overdose, wrong substance given or taken in error, wrong route of administration), first assign the appropriate code from categories T36–T38. Use additional code(s) for all manifestations of the poisoning. In this instance, the respiratory failure is a manifestation of the poisoning and is sequenced as a secondary diagnosis.

Acute pneumococcal pneumonia with subsequent development of acute respiratory failure
- J13 Pneumonia due to Streptococcus pneumoniae
- J96.00 Acute respiratory failure, unspecified whether with hypoxia or hypercapnia

Explanation: Acute respiratory failure may be listed as a secondary diagnosis if it occurs after admission, or if it is present on admission but does not meet the definition of principal diagnosis.

3) Sequencing of acute respiratory failure and another acute condition

When a patient is admitted with respiratory failure and another acute condition, such as a bacterial pneumonia, the principal diagnosis will not be the same in every situation. This applies whether the other acute condition is a respiratory or nonrespiratory condition. The selection of the principal diagnosis will depend on the circumstances of admission. If both the respiratory failure and the other acute condition are equally responsible for occasioning the admission to the hospital, and there are no chapter-specific sequencing rules, the guideline regarding two or more diagnoses that equally meet the definition for principal diagnosis (Section II, C) may be applied in these situations.

If the documentation is not clear as to whether acute respiratory failure and another acute condition are equally responsible for occasioning the admission, query the provider for clarification.

Acute pneumococcal pneumonia and acute respiratory failure, both present on admission
- J96.00 Acute respiratory failure, unspecified whether with hypoxia or hypercapnia
- J13 Pneumonia due to Streptococcus pneumoniae

Explanation: When a patient is admitted with respiratory failure and another acute condition, such as a bacterial pneumonia, the principal diagnosis is not the same in every situation. This applies whether the other acute condition is a respiratory or nonrespiratory condition. The principal diagnosis depends on the circumstances of admission.

Acute pneumococcal pneumonia and acute respiratory failure, both present on admission
- J96.00 Acute respiratory failure, unspecified whether with hypoxia or hypercapnia
- J13 Pneumonia due to Streptococcus pneumoniae

Explanation: When a patient is admitted with respiratory failure and another acute condition, such as a bacterial pneumonia, the principal diagnosis is not the same in every situation. This applies whether the other acute condition is a respiratory or nonrespiratory condition. The principal diagnosis depends on the circumstances of admission.
K50.9–K52.22 Chapter 11. Diseases of the Digestive System

ICD-10-CM 2018

K50.9 Crohn's disease, unspecified
K50.90 Crohn's disease, unspecified, without complications
K50.91 Crohn's disease, unspecified, with complications
K50.911 Crohn's disease, unspecified, with intestinal obstruction
K50.912 Crohn's disease, unspecified, with rectal bleeding
K50.913 Crohn's disease, unspecified, with fistula
K50.914 Crohn's disease, unspecified, with other complications
K50.919 Crohn's disease, unspecified, with unspecified complications

K51 Ulcerative colitis

K51.0 Ulcerative colitis, unspecified
K51.01 Ulcerative colitis, unspecified, with complications
K51.011 Ulcerative colitis, unspecified, with intestinal obstruction
K51.012 Ulcerative colitis, unspecified, with rectal bleeding
K51.013 Ulcerative colitis, unspecified, with fistula
K51.014 Ulcerative colitis, unspecified, with other complications
K51.019 Ulcerative colitis, unspecified, with unspecified complications

K51.1 Ulcerative colitis, proctitis

K51.10 Ulcerative (chronic) proctitis
K51.101 Ulcerative (chronic) proctitis with complications
K51.102 Ulcerative (chronic) proctitis with intestinal obstruction
K51.103 Ulcerative (chronic) proctitis with rectal bleeding
K51.104 Ulcerative (chronic) proctitis with fistula
K51.105 Ulcerative (chronic) proctitis with other complications
K51.109 Ulcerative (chronic) proctitis with unspecified complications

K51.2 Ulcerative colitis, rectosigmoiditis

K51.20 Ulcerative (chronic) rectosigmoiditis
K51.201 Ulcerative (chronic) rectosigmoiditis with complications
K51.202 Ulcerative (chronic) rectosigmoiditis with intestinal obstruction
K51.203 Ulcerative (chronic) rectosigmoiditis with rectal bleeding
K51.204 Ulcerative (chronic) rectosigmoiditis with fistula
K51.205 Ulcerative (chronic) rectosigmoiditis with other complications
K51.209 Ulcerative (chronic) rectosigmoiditis with unspecified complications

K51.3 Ulcerative colitis, rectal polyps

K51.30 Ulcerative (chronic) rectal polyps
K51.301 Ulcerative (chronic) rectal polyps with complications
K51.302 Ulcerative (chronic) rectal polyps with intestinal obstruction
K51.303 Ulcerative (chronic) rectal polyps with rectal bleeding
K51.304 Ulcerative (chronic) rectal polyps with fistula
K51.305 Ulcerative (chronic) rectal polyps with other complications
K51.309 Ulcerative (chronic) rectal polyps with unspecified complications

K51.4 Inflammatory polyps of colon

K51.40 Inflammatory polyps of colon, unspecified
K51.401 Inflammatory polyps of colon, unspecified, with complications

K51.5 Left sided colitis

K51.50 Left sided colitis
K51.501 Left sided colitis, with complications
K51.502 Left sided colitis, with intestinal obstruction
K51.503 Left sided colitis, with rectal bleeding
K51.504 Left sided colitis, with fistula
K51.505 Left sided colitis, with other complications
K51.509 Left sided colitis, unspecified, with unspecified complications

K51.6 Right sided colitis

K51.60 Right sided colitis
K51.601 Right sided colitis, with complications
K51.602 Right sided colitis, with intestinal obstruction
K51.603 Right sided colitis, with rectal bleeding
K51.604 Right sided colitis, with fistula
K51.605 Right sided colitis, with other complications
K51.609 Right sided colitis, unspecified, with unspecified complications

K51.8 Other ulcerative colitis

K51.80 Other ulcerative colitis
K51.801 Other ulcerative colitis, with complications
K51.802 Other ulcerative colitis, with intestinal obstruction
K51.803 Other ulcerative colitis, with rectal bleeding
K51.804 Other ulcerative colitis, with fistula
K51.805 Other ulcerative colitis, with other complications
K51.809 Other ulcerative colitis, unspecified, with unspecified complications

K51.9 Ulcerative colitis, unspecified

K51.90 Ulcerative colitis, unspecified, without complications
K51.901 Ulcerative colitis, unspecified, without intestinal obstruction
K51.902 Ulcerative colitis, unspecified, without rectal bleeding
K51.903 Ulcerative colitis, unspecified, without fistula
K51.904 Ulcerative colitis, unspecified, without other complications
K51.909 Ulcerative colitis, unspecified, without unspecified complications

K52 Other and unspecified noninfective gastroenteritis and colitis

K52.0 Gastroenteritis and colitis due to radiation

K52.1 Toxic gastroenteritis and colitis

K52.10 Toxic gastroenteritis and colitis
K52.101 Toxic gastroenteritis and colitis, with complications
K52.102 Toxic gastroenteritis and colitis, with intestinal obstruction
K52.103 Toxic gastroenteritis and colitis, with rectal bleeding
K52.104 Toxic gastroenteritis and colitis, with fistula
K52.105 Toxic gastroenteritis and colitis, with other complications
K52.109 Toxic gastroenteritis and colitis, with unspecified complications

K52.2 Allergic and dietetic gastroenteritis and colitis

K52.20 Allergic and dietetic gastroenteritis and colitis
K52.201 Allergic and dietetic gastroenteritis and colitis, with complications
K52.202 Allergic and dietetic gastroenteritis and colitis, with intestinal obstruction
K52.203 Allergic and dietetic gastroenteritis and colitis, with rectal bleeding
K52.204 Allergic and dietetic gastroenteritis and colitis, with fistula
K52.205 Allergic and dietetic gastroenteritis and colitis, with other complications
K52.209 Allergic and dietetic gastroenteritis and colitis, with unspecified complications

K52.3 Other gastroenteritis and colitis

K52.30 Other gastroenteritis and colitis
K52.301 Other gastroenteritis and colitis, with complications
K52.302 Other gastroenteritis and colitis, with intestinal obstruction
K52.303 Other gastroenteritis and colitis, with rectal bleeding
K52.304 Other gastroenteritis and colitis, with fistula
K52.305 Other gastroenteritis and colitis, with other complications
K52.309 Other gastroenteritis and colitis, with unspecified complications

K52.4 Gastroenteritis and colitis, unspecified

K52.40 Gastroenteritis and colitis, unspecified
K52.401 Gastroenteritis and colitis, unspecified, with complications
K52.402 Gastroenteritis and colitis, unspecified, with intestinal obstruction
K52.403 Gastroenteritis and colitis, unspecified, with rectal bleeding
K52.404 Gastroenteritis and colitis, unspecified, with fistula
K52.405 Gastroenteritis and colitis, unspecified, with other complications
K52.409 Gastroenteritis and colitis, unspecified, with unspecified complications

K52.5 Unspecified gastroenteritis and colitis

K52.50 Unspecified gastroenteritis and colitis
K52.501 Unspecified gastroenteritis and colitis, with complications
K52.502 Unspecified gastroenteritis and colitis, with intestinal obstruction
K52.503 Unspecified gastroenteritis and colitis, with rectal bleeding
K52.504 Unspecified gastroenteritis and colitis, with fistula
K52.505 Unspecified gastroenteritis and colitis, with other complications
K52.509 Unspecified gastroenteritis and colitis, with unspecified complications

K52.6 New Code

K52.60 New Code
### Injuries to the Knee and Lower Leg (S80-S89)

#### Maternity: 12-55

- **S80.0** Contusion of knee
  - S80.01 Contusion of right knee
  - S80.02 Contusion of left knee

#### Pediatric: 0-17

- **S80.1** Contusion of lower leg
  - S80.10 Contusion of unspecified lower leg
  - S80.11 Contusion of right lower leg
  - S80.12 Contusion of left lower leg

#### Adult: 15-124

- **S80.2** Other superficial injuries of knee
  - S80.21 Abrasion of knee
    - S80.211 Abrasion, right knee
    - S80.212 Abrasion, left knee
  - S80.22 Blister (nonthermal) of knee
    - S80.221 Blister (nonthermal), right knee
    - S80.222 Blister (nonthermal), left knee
  - S80.23 Burn of knee
  - S80.24 External constriction of knee
    - S80.241 External constriction, right knee
    - S80.242 External constriction, left knee
    - S80.249 External constriction, unspecified knee
  - S80.25 Superficial foreign body of knee
    - S80.251 Superficial foreign body, right knee
    - S80.252 Superficial foreign body, left knee
    - S80.259 Superficial foreign body, unspecified knee
  - S80.26 Insect bite (nonvenomous) of knee
    - S80.261 Insect bite (nonvenomous), right knee
    - S80.262 Insect bite (nonvenomous), left knee
    - S80.269 Insect bite (nonvenomous), unspecified knee
    - S80.27 Insect bite (nonvenomous) of ankle and foot (S90.-)
    - S80.271 Insect bite (nonvenomous), right ankle
    - S80.272 Insect bite (nonvenomous), left ankle
    - S80.279 Insect bite (nonvenomous), unspecified ankle

#### Nonroutine supply Dx

- **S80.8** External constriction of lower leg
  - S80.81 External constriction of left lower leg
  - S80.82 External constriction of right lower leg
  - S80.84 External constriction of lower leg
    - S80.841 External constriction, right lower leg
    - S80.842 External constriction, left lower leg
    - S80.849 External constriction, unspecified lower leg

#### Injuries to the Ankle and Foot (S90-S99)

- **S90.0** Contusion of ankle
  - S90.01 Contusion of right ankle
  - S90.02 Contusion of left ankle
- **S90.2** Other superficial injuries of ankle
  - S90.21 Abrasion of ankle
    - S90.211 Abrasion, right ankle
    - S90.212 Abrasion, left ankle
  - S90.22 Blister (nonthermal) of ankle
    - S90.221 Blister (nonthermal), right ankle
    - S90.222 Blister (nonthermal), left ankle
  - S90.23 Burn of ankle
  - S90.24 External constriction of ankle
    - S90.241 External constriction, right ankle
    - S90.242 External constriction, left ankle
    - S90.249 External constriction, unspecified ankle
  - S90.25 Superficial foreign body of ankle
    - S90.251 Superficial foreign body, right ankle
    - S90.252 Superficial foreign body, left ankle
    - S90.259 Superficial foreign body, unspecified ankle
  - S90.26 Insect bite (nonvenomous) of ankle
    - S90.261 Insect bite (nonvenomous), right ankle
    - S90.262 Insect bite (nonvenomous), left ankle
    - S90.269 Insect bite (nonvenomous), unspecified ankle
  - S90.27 Insect bite (nonvenomous) of finger and toe (S91.-)
    - S90.271 Insect bite (nonvenomous), right finger
    - S90.272 Insect bite (nonvenomous), left finger
    - S90.279 Insect bite (nonvenomous), unspecified finger

### Salter-Harris fractures

- **S79.12** Salter-Harris Type II physeal fracture of lower end of femur
  - S79.121 Salter-Harris Type II physeal fracture of lower end of right femur
  - S79.122 Salter-Harris Type II physeal fracture of lower end of left femur
- **S79.13** Salter-Harris Type III physeal fracture of lower end of femur
  - S79.131 Salter-Harris Type III physeal fracture of lower end of right femur
  - S79.132 Salter-Harris Type III physeal fracture of lower end of left femur
  - S79.139 Salter-Harris Type III physeal fracture of lower end of unspecified femur
- **S79.14** Salter-Harris Type IV physeal fracture of lower end of femur
  - S79.141 Salter-Harris Type IV physeal fracture of lower end of right femur
  - S79.142 Salter-Harris Type IV physeal fracture of lower end of left femur
  - S79.149 Salter-Harris Type IV physeal fracture of lower end of unspecified femur

### Injuries to the Hip and Thigh (S79.9-)

- **S79.9** Unspecified injury of hip and thigh
  - S79.91 Unspecified injury of hip
    - S79.911 Unspecified injury of right hip
    - S79.912 Unspecified injury of left hip
    - S79.919 Unspecified injury of unspecified hip
  - S79.92 Unspecified injury of thigh
    - S79.921 Unspecified injury of right thigh
    - S79.922 Unspecified injury of left thigh
    - S79.929 Unspecified injury of unspecified thigh

---

**Note:** The appropriate 7th character is to be added to each code in subcategory S80. The appropriate 7th character is to be added to each code in subcategory S79.8.
Chapter 10. Diseases of the Respiratory System (J00–J99)

Respiratory System

- Nasal cavity and paranasal sinuses
- Nostril
- Oral cavity
- Pharynx
- Larynx
- Trachea
- Right lung
- Left lung
- Carina of trachea
- Left main/primary bronchus
- Secondary (lobar) bronchi
- Tertiary (segmental) bronchi
- Bronchioles
- Alveoli
- Diaphragm
