Chapter 10. Diseases of the Respiratory System

Guidelines and Examples

Chapter 10. Diseases of the Respiratory System (J00-J99)

Chapter Specific Guidelines with Coding Examples

The chapter specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

a. Chronic obstructive pulmonary disease (COPD) and asthma

1) Acute exacerbation of chronic obstructive bronchitis and asthma

The diagnosis categories J44 and J45 distinguish between uncomplicated cases and those in acute exacerbation. An acute exacerbation is a worsening or a decompensation of a chronic condition. An acute exacerbation is not equivalent to an infection superimposed on a chronic condition, though an exacerbation may be triggered by an infection.

- Acute lower respiratory infection
- Chronic obstructive pulmonary disease with acute exacerbation
- Acute bronchitis due to Streptococcus
- Acute respiratory failure, unspecified whether with hypoxia or hypercapnia

Explanation: ICD-10-CM uses combination codes to create organism-specific classifications for acute bronchitis. Category J44 codes include combination codes with severity components, which differentiate between COPD with acute lower respiratory infection (acute bronchitis), COPD with acute exacerbation, and COPD without mention of a complication (unspecified).

An acute exacerbation is a worsening or a decompensation of a chronic condition. An acute exacerbation is not equivalent to an infection superimposed on a chronic condition, though an exacerbation may be triggered by an infection, as in this example.

- Acute bronchitis due to Streptococcus
- Acute respiratory failure
- Chronic obstructive pulmonary disease with acute exacerbation

b. Acute respiratory failure

1) Acute respiratory failure as principal diagnosis

A code from subcategory J96.0, Acute respiratory failure, or subcategory J96.1, Acute respiratory failure due to hypoxia or hypercapnia, is assigned as the principal diagnosis when it is the condition established after study to be chiefly responsible for occasioning the admission to the hospital, and the selection is supported by the Alphabetic Index and Tabular List. However, chapter-specific coding guidelines, such as poisoning, that provide sequencing direction take precedence. When coding a poisoning or reaction to the improper use of a medication (e.g. overdose, wrong substance given or taken in error, wrong route of administration), first assign the appropriate code from categories T40-T98. Use additional codes for all manifestations of the poisoning. In this instance, the respiratory failure is a manifestation of the poisoning and is sequenced as a secondary diagnosis.

- Pneumonia due to Streptococcus pneumoniae
- Acute respiratory failure due to accidental seconal overdose
- Acute respiratory failure due to accidental Codeine overdose
- Acute respiratory failure due to accidental oxycodone overdose
- Acute respiratory failure due to accidental Tylenol overdose
- Acute respiratory failure due to accidental vicholine overdose
- Acute respiratory failure due to accidental intravenous sedative overdose
- Acute respiratory failure due to accidental oxycodone overdose
- Acute respiratory failure due to accidental Tylenol overdose
- Acute respiratory failure due to accidental Vicholine overdose
- Acute respiratory failure due to accidental intravenous sedative overdose

2) Acute respiratory failure as secondary diagnosis

Respiratory failure may be listed as a secondary diagnosis if it occurs after admission, or if it is present on admission, but does not meet the definition of principal diagnosis.

ICD-10-CM categorizes certain muscles and tendons in the upper and lower extremities by their action (e.g., extension, flexion), their anatomical location (e.g., posterior, anterior), and/or whether they are intrinsic or extrinsic to a certain anatomical area. The Muscle/Tendon Table is provided at the beginning of chapters 13 and 19 as a resource to help users when code selection depends on one or more of these characteristics. The categories and/or subcategories that relate to this table are identified by the icon ✦. Please note that this table is not all-inclusive, and proper code assignment should be based on the provider’s documentation.
Hereditary nephropathy, not elsewhere classified with diffuse endocapillary proliferative glomerulonephritis
Hereditary nephropathy, not elsewhere classified with diffuse mesangiocapillary glomerulonephritis
Hereditary nephropathy, not elsewhere classified with membranoproliferative glomerulonephritis, types 1 and 5, or NOS
Hereditary nephropathy, not elsewhere classified with demyelinating disease
Hereditary nephropathy, not elsewhere classified with membranoproliferative glomerulonephritis, type 2
Hereditary nephropathy, not elsewhere classified with other morphologic lesions
Hereditary nephropathy, not elsewhere classified with prolifeating glomerulonephritis
Glomerulonephritis in diseases classified elsewhere
Nephritis
N10 Acute tubulo-interstitial nephritis
Acute infective interstitial nephritis
Acute pyelitis
Acute pyelonephritis
Hemorrhagic nephritis
Myoglobin nephrosis
Use additional code (B95-B97), to identify infectious agent
N11 Chronic tubulo-interstitial nephritis
Chronic infectious interstitial nephritis
Chronic pyelitis
Chronic pyelonephritis
Use additional code (B95-B97), to identify infectious agent
N13 Nonobstructive reflux associated chronic pyelonephritis
Pyelonephritis (chronic) associated with anonyum of pelviureteric junction
Pyelonephritis (chronic) associated with crossing of vessel
Pyelonephritis (chronic) associated with thinning of ureter
Pyelonephritis (chronic) associated with structure of pelviureteric junction
Pyelonephritis (chronic) associated with structure of ureter
Nonobstructive chronic pyelonephritis NOS
N13.8 Other obstructive and reflux nephropathy
Urinary tract obstruction due to specified cause
Code first, if applicable, any causal condition, such as
N13.9 Obstructive and reflux nephropathy
Cystitis due to drug or toxin, if applicable (T36-T65 with fifth or sixth character 1-4 or 6)
N16 Drug- and heavy-metal-induced tubulo-interstitial and tubular conditions
N16.0 Lead poisoning
N16.1 Mercury poisoning
N16.2 Arsenic poisoning
N16.3 Cadmium poisoning
N16.4 Antimony poisoning
N16.5 Arsenical nephropathy
N16.6 Toxic epidermal necrolysis
N16.7 Renal proximal tubular dysfunction, unspecified
N16.8 Other renal proximal tubular dysfunction
N16.9 Other renal tubulo-interstitial diseases
Renal tuberculosis (N18-N16)
Infection of amniotic sac and membranes, unspecified

- O41.10 Infection of amniotic sac and membranes, unspecified, first trimester
- O41.18 Infection of amniotic sac and membranes, unspecified, third trimester
- O41.19 Infection of amniotic sac and membranes, unspecified, unspecified trimester

Disorder of amniotic fluid and membranes, unspecified

- O41.82 Oligohydramnios, unspecified trimester
- O41.83 Oligohydramnios, unspecified trimester

Maternal care for fetal problem, unspecified

- O41.8 Maternal care for other specified fetal problems, unspecified trimester

Other specified disorders of amniotic fluid and membranes

- O41.8X Other specified disorders of amniotic fluid and membranes
- O41.8X1 Other specified disorders of amniotic fluid and membranes, unspecified trimester
- O41.8X2 Other specified disorders of amniotic fluid and membranes, unspecified trimester
- O41.8X3 Other specified disorders of amniotic fluid and membranes, unspecified trimester

Preterm premature rupture of membranes

- O42.0 Preterm premature rupture of membranes
- O42.01 Preterm premature rupture of membranes, onset of labor within 24 hours of rupture
- O42.019 Preterm premature rupture of membranes, onset of labor within 24 hours of rupture, unspecified trimester
- O42.013 Preterm premature rupture of membranes, onset of labor within 24 hours of rupture, second trimester
- O42.011 Preterm premature rupture of membranes, onset of labor within 24 hours of rupture, third trimester
- O42.012 Preterm premature rupture of membranes, onset of labor within 24 hours of rupture, unspecified trimester

Placentitis, unspecified trimester

- O41.129 Placentitis, unspecified trimester
- O41.14 Placentitis, unspecified trimester
- O41.141 Placentitis, first trimester
- O41.142 Placentitis, second trimester
- O41.143 Placentitis, third trimester
- O41.149 Placentitis, unspecified trimester

Polyhydramnios

- O40 Polyhydramnios
- O40.1 Polyhydramnios, first trimester
- O40.2 Polyhydramnios, second trimester
- O40.3 Polyhydramnios, third trimester

Decreased fetal movements

- O36.81 Decreased fetal movements, first trimester
- O36.813 Decreased fetal movements, second trimester
- O36.819 Decreased fetal movements, third trimester

Fetal anemia and thrombocytopenia

- O36.82 Fetal anemia and thrombocytopenia, first trimester
- O36.821 Fetal anemia and thrombocytopenia, second trimester
- O36.823 Fetal anemia and thrombocytopenia, third trimester

Maternal care for other specified fetal problems

- O36.89 Maternal care for other specified fetal problems, unspecified trimester
- O36.891 Maternal care for other specified fetal problems, first trimester
- O36.892 Maternal care for other specified fetal problems, second trimester
- O36.893 Maternal care for other specified fetal problems, third trimester
- O36.899 Maternal care for other specified fetal problems, unspecified trimester

Maternal care for fetal problem, unspecified

- O36.9 Maternal care for fetal problem, unspecified trimester
- O36.90 Maternal care for fetal problem, unspecified trimester
- O36.91 Maternal care for fetal problem, unspecified trimester
- O36.92 Maternal care for fetal problem, unspecified trimester
- O36.93 Maternal care for fetal problem, unspecified trimester
- O36.99 Maternal care for fetal problem, unspecified trimester

Infection of amniotic sac and membranes

- O36.89 Infection of amniotic sac and membranes
- O36.891 Infection of amniotic sac and membranes, first trimester
- O36.892 Infection of amniotic sac and membranes, second trimester
- O36.893 Infection of amniotic sac and membranes, third trimester
- O36.899 Infection of amniotic sac and membranes, unspecified trimester

Manifestation

- O36.818 Manifestation
- O36.819 Manifestation
- O36.82 Manifestation

Other specified disorders of amniotic fluid and membranes

- O41.8 Other specified disorders of amniotic fluid and membranes
- O41.81 Other specified disorders of amniotic fluid and membranes, first trimester
- O41.82 Other specified disorders of amniotic fluid and membranes, second trimester
- O41.83 Other specified disorders of amniotic fluid and membranes, third trimester
- O41.89 Other specified disorders of amniotic fluid and membranes, unspecified trimester

Polyhydramnios

- O40.2 Polyhydramnios, second trimester
- O40.3 Polyhydramnios, third trimester
- O40.1 Polyhydramnios, first trimester

Oligohydramnios

- O41.0 Oligohydramnios
- O41.00 Oligohydramnios, first trimester
- O41.01 Oligohydramnios, second trimester
- O41.02 Oligohydramnios, second trimester
- O41.03 Oligohydramnios, third trimester
- O41.09 Oligohydramnios, unspecified trimester

Chapter 15. Pregnancy, Childbirth, and the Puerperium

- O36.9 Maternal care for fetal problem, unspecified trimester
- O36.90 Maternal care for fetal problem, unspecified trimester
- O36.91 Maternal care for fetal problem, unspecified trimester
- O36.92 Maternal care for fetal problem, unspecified trimester
- O36.93 Maternal care for fetal problem, unspecified trimester
- O36.99 Maternal care for fetal problem, unspecified trimester

Polyhydramnios

- O40 Polyhydramnios
- O40.1 Polyhydramnios, first trimester
- O40.2 Polyhydramnios, second trimester
- O40.3 Polyhydramnios, third trimester
- O40.9 Polyhydramnios, unspecified trimester

Other specified disorders of amniotic fluid and membranes

- O41 Other specified disorders of amniotic fluid and membranes
- O41.1 Other specified disorders of amniotic fluid and membranes, first trimester
- O41.2 Other specified disorders of amniotic fluid and membranes, second trimester
- O41.3 Other specified disorders of amniotic fluid and membranes, third trimester
- O41.9 Other specified disorders of amniotic fluid and membranes, unspecified trimester

Oligohydramnios

- O41.0 Oligohydramnios
- O41.00 Oligohydramnios, first trimester
- O41.01 Oligohydramnios, second trimester
- O41.02 Oligohydramnios, second trimester
- O41.03 Oligohydramnios, third trimester
- O41.09 Oligohydramnios, unspecified trimester

Maternal care for fetal problem, unspecified trimester

- O36.8 Maternal care for other specified fetal problems, unspecified trimester
- O36.81 Maternal care for other specified fetal problems, first trimester
- O36.813 Maternal care for other specified fetal problems, second trimester
- O36.819 Maternal care for other specified fetal problems, third trimester
- O36.89 Maternal care for other specified fetal problems, unspecified trimester

Maternal care for fetal problem, unspecified trimester

- O36.9 Maternal care for other specified fetal problems, unspecified trimester
- O36.90 Maternal care for other specified fetal problems, unspecified trimester
- O36.91 Maternal care for other specified fetal problems, unspecified trimester
- O36.92 Maternal care for other specified fetal problems, unspecified trimester
- O36.93 Maternal care for other specified fetal problems, unspecified trimester
- O36.99 Maternal care for other specified fetal problems, unspecified trimester

Infection of amniotic sac and membranes

- O36.8 Infection of amniotic sac and membranes
- O36.88 Infection of amniotic sac and membranes, onset of labor within 24 hours of rupture
